Master's Degree of Computer Engineering
Hong Kong Polytechnic University

📅 2013 - 2015   📍 Hung Hom, Hong Kong

PASSIONS

🏆 My best skill - 101%
When I think it's perfect, I push myself up once more to make it better - pursuing 101% is my nature and working style. That is also the key to 100% customer satisfaction

🔥 Beyond limits - challenge & overcome myself
I started my developer career not only for filling my pockets but also my heart because development is my passion and hobby itself. I always trends to challenge difficult problems which no one dares to try and when I overcome it, I feel closer to my dream.
Actually I wrote my first program on a Commodore64 at age 6. I built my first website at age 13 at the dawn of the home internet connection. I always wanted to be a software engineer.
